Quality & Environmental Policy

GRF Engineering Limited is a privately-owned company and is in the business of sub-contract machining and assembly of metal components in accordance to customer specifications.

We are aware of the significance of quality & environmental systems for our day to day activities as well as our stakeholders' needs & expectations.

We have set up an integrated quality & environmental management system in accordance with ISO 9001:2015 and ISO 14001:2015 standards. The main cornerstones of these systems are:

- Setting quality & environmental requirements in the workplace as strategic elements for the operations of the company*
- Understanding current and future needs of our customers to achieve full customer satisfaction*
- Mitigate risks to prevent non-conformities and determine opportunities to enhance customer satisfaction and to achieve our objectives*
- Promoting communication, training and awareness of employees/workers and improving their skill sets*
- Targeting our efforts to continuously improve the quality of our products/services as well as efficiency of our processes, boosting our relationship with our customers*
- Planning our activities in such a way that it prevents pollution, protects the environment and continual improvement of the system*
- Comply with all applicable requirements such as customers, statutory and regulatory requirements and fulfil our environmental compliance obligations*
